

IDS Links Installation Steps

The steps below will guide you through the installation and access the IDS Links program, which enables you to access your MLS system through a Macintosh computer.

1. Open your Internet browser and navigate to <http://ids.marketlinx.com/nativemac.html>.

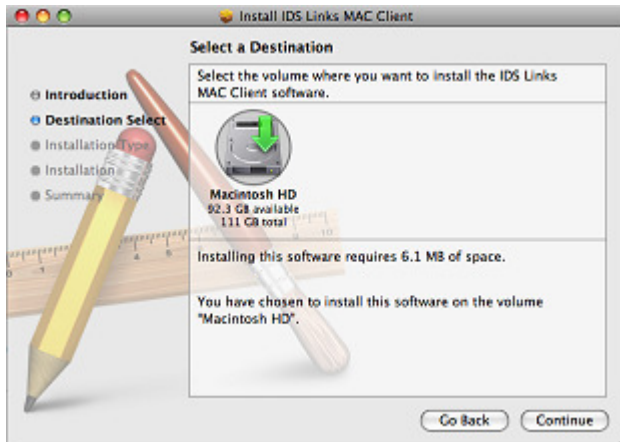

2. Click the **here** link to open the install dialog.

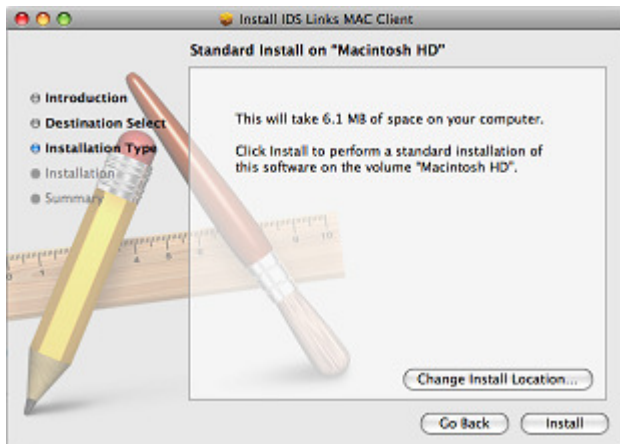

IDS Links Installation Steps

3. Click **Continue**.

4. Select the HD on which to install the application and click **Continue**:

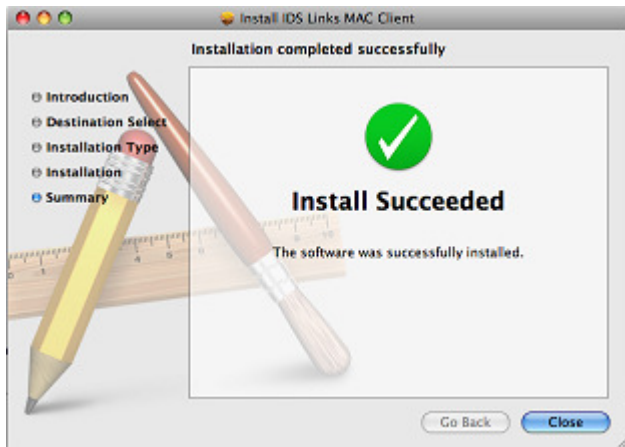

5. Click **Install**.

IDS Links Installation Steps

6. A message will inform you when the installation is complete.

7. Click **Close** to complete the installation. Restart your Macintosh.
8. To create the shortcut for IDS, Open your Internet browser and navigate to http://ids.marketlinx.com/IDS_ACTRIS.zip
9. If prompted to open or save the file, choose to save the file and click OK. Your file should be in the download window:

IDS Links Installation Steps

- 10.** If Safari was used to download the file, click on the Finder button  to show the directory where the file downloaded. If another browser was used, you may need to double-click the compressed file in the window.

- 11.** In the next window, select the **IDS ACTRIS** file to highlight. Click and drag this file to your Mac Desktop (you may need to minimize your Internet browser first in order to see your Desktop).

- 12.** Double-click the **IDS ACTRIS** icon from your Mac Desktop to access the IDS program. You may receive a message from your Mac asking if you want to open the application. Click the **Open** button.

- 13.** You will then be presented with the application window. Double-click your MLS program icon and login as you normally would.
